Think of anything and you have it with **PEACE** Slotted Angles, as Rack to a Roof and Bed to a Bridge is possible (A versatile product)

These racks derive their utility for the storage of pallets. Every industry needs a systematic storage facility to store its bulk raw material, finished products etc. Pallet racks solve this purpose. Heavy bulky goods, articles are placed on pallets which are further stacked on these racks with a help of a stacker. All kind of customization as per customer requirement is available.

ADVANTAGES

- Best Suited for Heavy Duty Palletised Items
- Easy Multiplication of storage Space by addition of tiers

***Available in Painted, Powder Coated & G.I. Finish**

INDUSTRIAL PALLETES

Industrial pallets specifies pallets as flat transport structures that support goods in a stable fashion while being lifted by a forklift, pallet truck or other jacking device. a pallet is a structural foundation of unit load which allows handling and storage efficiency. Pallet make it easier to move heavy stacks.

The standard size of pallet is 1000x1200mm. They are available in Ms pipe or in Ms sheet as per customer requirement.

***Available in Painted, Powder Coated Finish**

PALLET RACKS WITH SHELVES

Dropin Panel Racking
with Locking Bracket
horizontal Beam

These Racks are best suited for storage of heavy duty non palletised Items & have multiproducts & multipurpose utilities.

DIE RACKS

DIE is the Life line of any sheet metal industry and these racks are best suited for storage of both small and heavy dies.

***Also Available in
Pull Out / Glide Out
System**

Die Rack With Shelves

Die Rack Without Shelves

MULTI TIER PALLET RACKS

***Available in Painted, Powder Coated & G.I. Finish**

MEZZANINE FLOORS

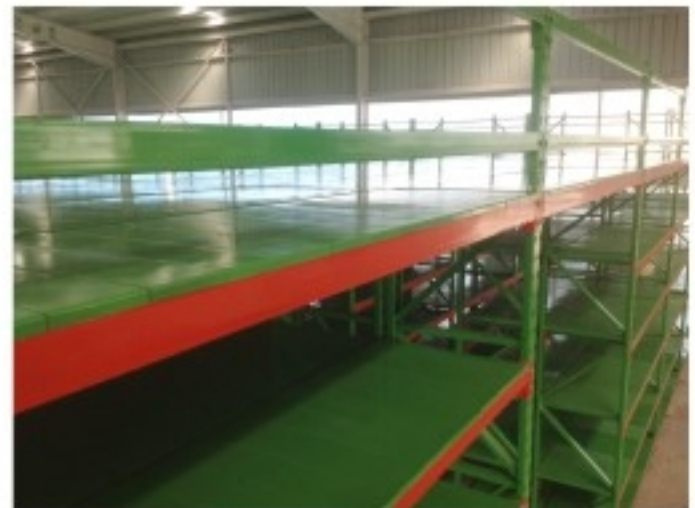

Mezzanine floor systems are semi- permanent floor systems typically installed within buildings,built between two permanent original stories.These are usually erected on steel pillars.These floors come in knocked down conditions and can be easily relocated if required. All kind of customization is available here.

ADVANTAGES

- Lower Investment Cost into realestate & Buildings
- Best Suited for Storage of unsorted & unequal Sized Cartons or fluffy large sized Items

SELECTIVE PALLET RACKS WITH MEZZANINE

This Product is a combination of selective pallet Racking & Mezzanine Floors in which standard products can be stored on the racks & non standardize products can be stored atop on mezzanine.

DRIVE-IN RACKS

Drive-in racks derive their utility from the increasing demand of industry to store their pallets in a chronological and systematic way. These are storage racks configuration that allow the fork lift to drive directly into the lane of stack rows (called a bay). They are available in all customized sizes and specifications.

ADVANTAGES

- Drive-in racks increase the storage space by upto 80%.
- It requires fewer aisles and has better cubic storage

CANTILEVER RACKS

These racks are highly recommended for long and bulky items. Cantilever racking can be manufactured for single or double faced usage. Adjustable cantilever arms allow easy adjustment to different kinds of storage height and loads.

Fabric racks are racks made for storage of fabrics rolls in bulk quantity. They play a very important role in organising the fabrics of hosiery units which in turn helps them in saving time and increases their efficiency. They can be customised as per the length of the rolls and can be made upto a capacity of 3 tonnes/tier udl.

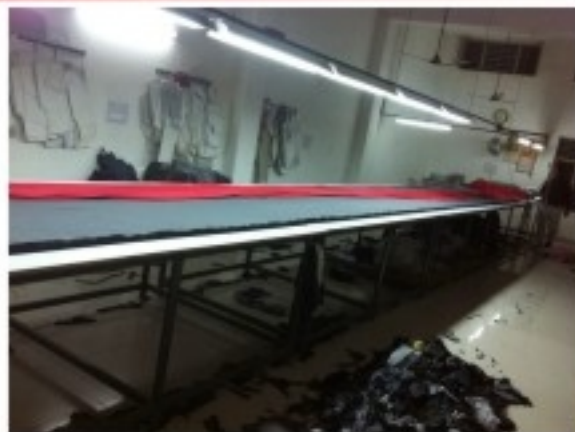

ADVANTAGES

- Highly Customized
- Highly recommended for Hosiery Keeping large stock of fabric rolls

***Available in Painted, Powder Coated & G.I. Finish**

CUTTING TABLE / CHECKING TABLES

Cutting and checking table are tables exclusively made for hosiery units, which is required for them for cutting and checking of fabrics. Standard size of these tables is 8" x 4". These tables can be made out of pipe or slotted angles. All kind of customization is available.

***Available in Painted & Powder Coated Finish**
